

Landmark Regulated Coal Report

Suitable for residential sites

The Landmark Regulated Coal Report is a CIE Regulated assessment of coal risk that provides a detailed assessment regarding environmental or ground stability hazards resulting from past, current or future underground or opencast mining activities. It also includes information relating to subsidence claims, mine entry points, surface hazards and mining geology that may impact on a property.

The Benefits to you

Specialist recommendations and professional opinion

Thorough industry knowledge of mining information, its complexities and limitations, Landmark Regulated Coal report is backed by an expert team of former Coal Authority officers and industry surveyors, ensuring requirements of a coal search are satisfied.

Unique and frequently updated mining data

Utilising PinPoint's proprietary data and its intelligent Zone of Influence algorithms to

automatically calculate risk, Landmark Regulated Coal report is a reliable source to help professionals easily interpret hazards relating to a property address.

Accuracy, Speed and Reliability

With a turnaround time of within an hour, Professional Indemnity cover of £10 million and Information Accuracy Indemnity of £100,000 per report, provided by Aviva, Landmark Regulated Coal is reassuringly efficient.

When do I need this?

This Regulated report is ideal for conveyancers who are completing their due diligence on a property and need a residential coal report. It can easily be combined with your environmental report to receive both results promptly.

When do I use this?

When requiring a detailed assessment and Professional Opinion regarding ground stability hazards resulting from past, current or future underground or opencast mining. And whether there is likely to be any effect on the value or enjoyment of the property.

What's included:

- The Landmark Regulated Coal Report assesses the impact of the following:

POWERED BY
PINPOINTCOAL

Delivering mining insight and assurances

Landmark Regulated Coal powered by PinPoint supports property solicitors, lenders and clients by providing expert intelligence and interpretation regarding mining-related hazards. It does so in an easy to read and understand report that advises on the potential impact mining activity may have on the property in question.

Why choose Landmark's Regulated Coal Report?

- Automated service delivers accuracy, speed, capacity and consistent pricing
- Data independently verified and tested for accuracy
- Technical queries are handled by industry professionals and experts e.g. Minerals Surveyor
- Accurate reporting of risks, even in areas known by The Coal Authority to be problematic
- Meets extensive due diligence requirements
- All Landmark Regulated Coal reports are signed-off by PinPoint Director Phil Huddleston MRICS Chartered Mineral Surveyor, former Head of Mining Information at The Coal Authority
- Includes underground roadways, mineral screening and mining geology as standard
- Brine risk insurance provides peace of mind
- Expert analysis and assessment at a cost effective rate

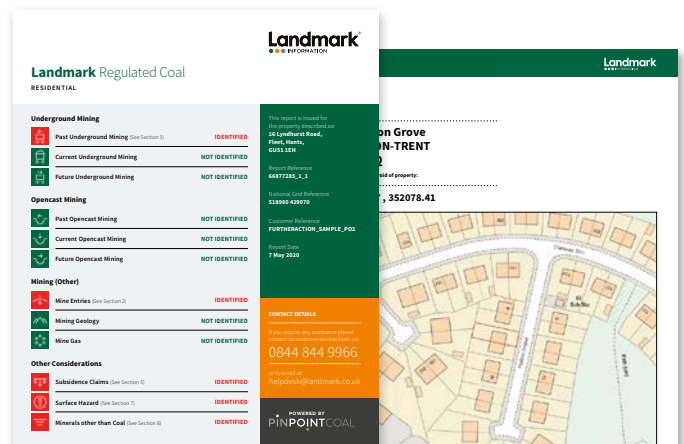

About PinPoint Information

With decades of experience in the sector, PinPoint Information has been providing due diligence reports to property professionals to help them identify, understand and assess risks.

With a specialism in Mining Reports, the expert team has established its own extensive database of coal mining data and, combined with advanced risk modelling algorithms and techniques, PinPoint provides specialist support, consistent opinion and guidance to help clients in understanding ground-based risks.

PinPoint is uniquely placed to provide pre-processed data models, which deliver critical layers of data not currently available from other providers.

What's more, as PinPoint is only partially reliant on third party data, annual price increases from the Coal Authority have only a limited impact on PinPoint's pricing, ensuring security of data supply and consistently swift delivery.

Landmark is at the forefront of legal products and data supply to the UK's property market. Our pioneering tech, data, reports and expert team enable thousands of successful property transactions, every day.
