Spotlight on the cost-saving and  
revenue benefits  
of xWDM technologies for ISPs

Marcin Bała  
CTO at Salumanus

# What is xWDM

- It is virtualisation” of your fibre
- It is transmission independent
- It is easy with us

# Cost saving

- Reducing the number of transmission leased lines
- Reducing the number of fibres leased
- Reducing the cost of connecting a new client

# Optimizing resources

- More clients on a single fibre
- Simultaneous GPON and Ethernet transmission
- Higher bandwidth at identical costs

# Time is money

- Do it whenever you want!
- Less paperwork
- Become provider independent

# Be ready

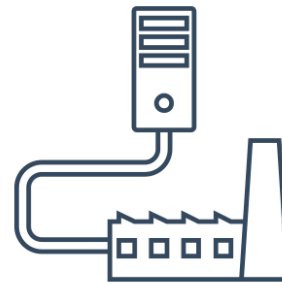

- For higher bandwidth
- For faster service delivery
- For higher profits
