

REGISTRATION LINK FOR THE FIRST DAY (GOVERNANG PRESENTATION)

- 10:00-10:15** Welcome and introduction by SUDOANG coordinator (*Estibaliz Díaz, AZTI*).
- 10:15-10:30** Presentation of the eel governance platform GOVERNANG by *Antonio García Allut, LONXANET Foundation*.
- The critical situation of the eel requires the collaboration of all stakeholders and collective construction in the search for solutions. In this presentation we will briefly explain what steps have been taken to build it and what its purpose is.
- 10:30-11:00** Question time.
- Participants will be able to ask questions about the platform, after which an explanation will be given on how the Governance Workshop will be organised.
- 11:00-12:45** Workshop to strengthen GOVERNANG (only for SUDOANG members) by *ARC MEDIACION AMBIENTAL*.
- Given the scenario of the end of SUDOANG, through participatory dynamics, concrete actions for the sustainability of GOVERNANG will be identified.
- 12:45-13:00** Closing of the meeting

DAY 2
10-13 h
14-16h
Brussels 🕒

REGISTRATION LINK FOR THE SECOND DAY (VISUANG PRESENTATION)

10:30-10:45 Welcome and introduction by SUDOANG coordinator (*Estibaliz Díaz, AZTI*).

10:45-11:00 VISUANG: an interactive tool for the visualisation of eel-related data by *María Korta, AZTI*.

At SUDOANG we believe that we have had enough of complicated and boring reports. That is why we have decided to take a fresh and interactive approach and build an interactive web tool using Shiny to show you the data we have collected and the results we have obtained. Maria will briefly explain how we developed the tool and what it contains.

11:00-13:00 Workshop: What VISUANG can do for you? Animated by: *M. Mateo and M. Korta, AZTI; C. Briand, EPTB/ Vilaine; P. Sagnes and L. Beaulaton, OFB; H. Drouineau, INRAE; I. Domingos, FCUL/MARE*.

During this workshop we will be divided into language groups. Each group will go through different workshops where they will be shown the different types of information that VISUANG offers: an eel atlas, information on barriers and hydropower plants, recruitment indices, escapement and information on the SUDOANG pilot basins. The coordinators will demonstrate the functionalities for each case and conduct a series of exercises with the participants.

13:00-14:00 Lunch

14:00-16:00 Continuation of the workshop: What VISUANG can do for you?

16:00-16:15 Closing of the meeting (*Estibaliz Díaz, AZTI*).
